SHOAL DRAFT
TWIN KEEL

Accommodation is in two cabins, with large heads and two hanging lockers between. The door of one hanging locker will close off the forward cabin if required.

The forward cabin gives two 6ft berths, and headroom under the fore hatch is 5ft 11ins (1.80m).

The main cabin provides a generous 6ft 4ins (1.93m) of headroom, and each of the bunks is over 6ft (1.83m) long.

L-shaped seating at the cabin table allows six to eat in comfort. Every possible space is used to provide storage. There are generous lockers under all bunks, behind the hinged, cushioned seat backs and lockers with sliding doors are fitted under the side decks.

Choices: Ketch or Sloop rig; Aft or 'midships galley.

Main cabin, looking aft; aft galley.

Main cabin, looking for'ard; midships galley.

PENTLAND

SHOAL DRAFT
TWIN KEEL

Accommodation is in three cabins. The heads, hanging lockers and forecabin sections are identical on these two versions with those of Longbow and Berwick. The centre cockpit allows for a separate aft cabin, with its own hatch. The fore and main cabins each offer two 6ft (1.83m) + berths and over 6ft headroom.

Two more 6ft + berths are found in the aft cabin behind the cockpit.

As in Longbow and Berwick, there is ample stowage and L-shaped seating. Each boat offers an unusually high degree of family cruising comfort. There is seating for six in the cockpit, and the same number can sit comfortably round the cabin table thanks to the sliding chart table and storage cabinet which runs under the cockpit when not in use.

Choices: Ketch or Sloop rig; Aft or 'midships galley.

Main cabin, looking aft - Note chart table.

Main cabin, looking forward, aft galley.

Westerly 31ft Craft★

The Westerly 31ft range has been developed to suit the various needs of our many customers. It consists of four versions of one basic hull design, each available with a choice of rigs and interior layouts.

Pentland and Renown have an aft cabin; Berwick and Longbow an aft cockpit.

All are designed by Laurent Giles and Partners as 5/6 - berth off shore sailing cruisers, very seaworthy and capable of making ocean passages. All offer a good standard of comfort for a cruising family, with practical cabins and ample stowage for sailing gear, personal gear and stores, and with uncluttered decks and roomy cockpits. A powerful auxiliary engine is fitted as standard.

The heads are very spacious, and you can choose from a wide range of furnishing materials. Cabin bulkheads and furniture are of wood wherever practical, and there are two insulated ice boxes.

Construction is extremely robust, with heavy reinforcement at key points. Precise, solid workmanship in top-quality materials is a feature of all Westerlys, and fittings are also of first quality throughout. For instance, all deck fittings are through bolted with backing-plates, keels are secured by heavy stainless steel threaded studs; the rudders have stainless steel stocks and stiffening rods; and decks are treated with really effective non-slip paint. Every boat is carefully checked throughout building and is issued with a Lloyd's Register certificate.

This brochure cannot do more than give a general impression of Westerly 31ft craft. Only a test-sail will enable you to evaluate them properly, and any of our sales and service centres will be happy to arrange this. We'll also be glad to show you round our factory at Waterlooville if you're able to visit us.

Optional extras In addition to a very full standard specification, a comprehensive list of extras is available, which includes a spray hood, pressure water system, shower, water heater, double-berth conversions, and 3-cylinder diesel.

Ketch or sloop rig is available on all models. Ketch rig offers somewhat easier handling for very little loss of power or sail area, and can be readily sailed by a husband and wife team.

Aft or 'midships galley Each boat can be fitted with a galley placed centrally to give maximum working space, or aft near the main hatch. Our sales staff will

gladly discuss which would suit your own requirements best. In the meantime, layout diagrams with the brochure show the different arrangements in detail.

After sales service Westerly attach great importance to after-sales service, and endeavour to provide every owner with all the assistance needed with modifications, repairs, advice and sailing instruction if required. This service accounts, to a large extent, for the very high second-hand value of all Westerlys.

Chandlery and spares are available from Westerly's shop at Waterlooville for all your equipment and stores.
