

# Welcome aboard the boat with the family circle!

With the Pageant (brilliantly designed by Laurent Giles and Partners) Westerly has found a way to give you a beautifully sleek hull *and* *extreme roominess*. So now the real family circle feeling that can make all the difference to happy holidays, goes afloat!

## Put yourself in the Pageant picture

**A** The new L shape dinette—with ice box under the seat—is Pageant's big space saver, and this is how it looks from the point marked on the diagram. Very comfortable

indeed (padded seat backs) for eating, or for lolling about in between times. And you could use the dinette as a double berth—making five in all!

**B** Separate, properly ventilated head.

Superb galley, with everything you want where you want it. Plenty of storage, plenty of easy-to-clean working surface, and running water from a fresh water tank. Sailing wives and girlfriends *should* have things made easy for them!

Twin keels make trailing easy! They also mean easier cruising in shoal water and safe drying out on a tidal mooring.

**LOCKERS UNDER ALL BERTHS**

**D** View from the point marked on the diagram, looking aft. Note the large, really comfortable berth — formed by lowering the dinette table. And one of Pageant's many roomy lockers.

**E** Pageant's main cabin. Well ventilated, and beautifully fitted and finished. It has a foam-backed vinyl headliner. In every detail, in fact, you get the high quality you expect in a boat with the Westerly name.

**F** This is what you see, standing here on the diagram and looking into the forward cabin. Generous hanging space is provided (just out of the bottom left of the picture: see diagram). The two berths are foam upholstered, with covers available in a choice of colours. Headroom is 6 ft.
